

When the presentation has to be perfect!

ENVIRONMENT MANAGEMENT AND SUSTAINABILITY POLICY

Statement of Intent:

Senna Technology Systems is committed to sustainable management and conservation of the environment throughout its operations and by promoting sustainable management solutions to its clients and employees. We continually seek to minimize adverse impacts on the environment and local communities while operating our business ethically and responsibly. Senna has an important role to play in sustaining the environment, always seeking to discuss and implement ways to meet global sustainability challenges. Our sustainability priorities are shared ones and we support and encourage an open exchange of ideas with clients, employees and the community.

Policy Objectives:

- Continually improve the environmental management system to ensure that it is appropriate and effective for helping us to achieve our environment goals;
- Develop environmental objectives and targets, implement programs to achieve them;
- Comply with applicable laws, regulations, codes of practice and other requirements;
- Implement "Reduce, Reuse & Recycle" awareness programs to encourage all Senna personnel to be involved in environmental management and ensuring that all employees understand and use correct methods to minimize resource consumption and control waste materials; and
- Identify materials, processes, products and wastes that cause or may cause pollution, and will promote and implement measures to avoid, reduce or control pollution where technically and economically viable.

Strategies:

Senna maintains an Environment Management System to improve its environmental management and reduce the environmental impact of its operations, products and services contributing to a sustainable future for all.

All employees at Senna Technology Systems are responsible for adhering to these objectives to ensure the best environmental outcomes. Management is responsible for ensuring adherence to the Environmental Management System and for recording the impact of environmental improvements.

Policy Review and Dissemination:

During induction each employee will be provided with a copy of the policy. Employees will have ready access to all environmental policies and procedures. This policy will be reviewed at least every two years to ensure its continued sustainability.
